DETAILED ACTION

Priority

1. Applicant's claim for the benefit of a prior-filed application under 35 U.S.C. 119(e) or under 35 U.S.C. 120, 121, or 365(c) is acknowledged. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. [1] as follows:

The later-filed application must be an application for a patent for an invention which is also disclosed in the prior application (the parent or original nonprovisional application or provisional application). The disclosure of the invention in the parent application and in the later-filed application must be sufficient to comply with the requirements of the first paragraph of 35 U.S.C. 112. See *Transco Products, Inc. v. Performance Contracting, Inc.*, 38 F.3d 551, 32 USPQ2d 1077 (Fed. Cir. 1994).

The disclosure of the prior-filed application, Application No. 10/309850, fails to provide adequate support or enablement in the manner provided by the first paragraph of 35 U.S.C. 112 for one or more claims of this application.

The prior art application does not provide support for claimed subject matter such as: determining a phase transition pressure in retrograde condensate, producing an OBM contamination value, producing a time-series fluorescence value; moving fluid through a phase segregator; or validating a single- or multi- phase flow.

2. It is noted that this application appears to claim subject matter disclosed in prior Application No. 10/309,850, filed 3 December 2002. A reference to the prior application must be inserted as the first sentence(s) of the specification of this application or in an application data sheet (37 CFR 1.76), if applicant intends to rely on the filing date of the prior application under

Art Unit: 2884

35 U.S.C. 119(e), 120, 121, or 365(c). See 37 CFR 1.78(a). For benefit claims under 35 U.S.C. 120, 121, or 365(c), **the reference must include the relationship (i.e., continuation, divisional, or continuation-in-part) of all nonprovisional applications.** If the application is a utility or plant application filed under 35 U.S.C. 111(a) on or after November 29, 2000, the specific reference to the prior application must be submitted during the pendency of the application and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior application. If the application is a utility or plant application which entered the national stage from an international application filed on or after November 29, 2000, after compliance with 35 U.S.C. 371, the specific reference must be submitted during the pendency of the application and within the later of four months from the date on which the national stage commenced under 35 U.S.C. 371(b) or (f) or sixteen months from the filing date of the prior application. See 37 CFR 1.78(a)(2)(ii) and (a)(5)(ii). This time period is not extendable and a failure to submit the reference required by 35 U.S.C. 119(e) and/or 120, where applicable, within this time period is considered a waiver of any benefit of such prior application(s) under 35 U.S.C. 119(e), 120, 121 and 365(c). A benefit claim filed after the required time period may be accepted if it is accompanied by a grantable petition to accept an unintentionally delayed benefit claim under 35 U.S.C. 119(e), 120, 121 and 365(c). The petition must be accompanied by (1) the reference required by 35 U.S.C. 120 or 119(e) and 37 CFR 1.78(a)(2) or (a)(5) to the prior application (unless previously submitted), (2) a surcharge under 37 CFR 1.17(t), and (3) a statement that the entire delay between the date the claim was due under 37 CFR 1.78(a)(2) or (a)(5) and the date the claim was filed was unintentional. The Director may require additional information where there is a question whether the delay was

Art Unit: 2884

unintentional. The petition should be addressed to: Mail Stop Petition, Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450.

If the reference to the prior application was previously submitted within the time period set forth in 37 CFR 1.78(a), but not in the first sentence(s) of the specification or an application data sheet (ADS) as required by 37 CFR 1.78(a) (e.g., if the reference was submitted in an oath or declaration or the application transmittal letter), and the information concerning the benefit claim was recognized by the Office as shown by its inclusion on the first filing receipt, the petition under 37 CFR 1.78(a) and the surcharge under 37 CFR 1.17(t) are not required. Applicant is still required to submit the reference in compliance with 37 CFR 1.78(a) by filing an amendment to the first sentence(s) of the specification or an ADS. See MPEP § 201.11.

The application specification does not properly set forth the relationship of any prior application.

Specification

3. The disclosure is objected to because of the following informalities:

The first paragraph of the specification should be amended to reflect the current status of any prior applications.

Appropriate correction is required.

Allowable Subject Matter

4. Claims 1-34 are allowed.
5. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1, 22, 23, 25, 27, 29, 30, 32 and 34, while downhole fluorescence analysis of oil and other organic products are generally known in the art (see for

Art Unit: 2884

example Mullins *et al.* – US 2004/0000636 A1; Fujisawa *et al.* – US 2004/0000400 A1; Difoggio *et al.* – US 2003/0193662; Mullins *et al.* – US 2002/0139929; and Alfano *et al.* – US 5,656,810), such prior art does not suggest the methods of: determining a phase transition pressure of downhole retrograde condensate (independent claims 1 and 34); detecting a phase transition or multi-phase flow in a flow of downhole retrograde condensate (independent claim 22 and 29); establishing or validating single- or multi-phase flow of downhole retrograde condensate (independent claims 23, 25, 27) or setting a pressure in a cell at a transition boundary in a single- or multi-phase flow of downhole retrograde condensate (independent claims 30 and 32); in the manner as specifically claimed.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

7. This application is in condition for allowance except for the following formal matters: see explanation regarding priority claim and updated status thereof.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

8. A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
